1. Introduction

The east quay was built in three stages. The first stage, a timber jetty of twenty berths, dates from the start of the register; the second doubled it in stone, and the third, the long breakwater, shelters both from the south-west swell.

Every berth has a number, a length in metres and a holder. The register is kept on paper and in a table; the two are compared each spring, and the differences are explained in the notes of the harbour master. [1]

> *“A harbour is a promise that the sea will wait.”*

Visitors are asked to call the harbour office on channel 9 before they come in, to give the length of their boat and its draught, and to say how many nights they plan to stay.

2. Text and styles

2.1 Character formatting

Bold, *italic*, underlined, ~~struck through~~, red, highlighted, SMALL CAPITALS, large and `monospaced` text; H_2O and 10^3; a *mixed* style.

1 The register of 2000 lists sixty berths.

2.2 Paragraph formatting

The east quay was built in three stages. The first stage, a timber jetty of twenty berths, dates from the start of the register; the second doubled it in stone, and the third, the long breakwater, shelters both from the south-west swell. Every berth has a number, a length in metres and a holder. The register is kept on paper and in a table; the two are compared each spring, and the differences are explained in the notes of the harbour master.

moor --boat Aurora --length 6.5
berth 14 free until 06:00
```

2.3 A section in two columns

The east quay was built in three stages. The first stage, a timber jetty of twenty berths, dates from the start of the register; the second doubled it in stone, and the third, the long breakwater, shelters both from the south-west swell. Every berth has a number, a length in metres and a holder. The register is kept on paper and in a table; the two are compared each spring, and the differences are explained in the notes of the harbour master.

Visitors are asked to call the harbour office on channel 9 before they come in, to give the length of their boat and its draught, and to say how many nights they plan to stay. The east quay was built in three stages. The first stage, a timber jetty of twenty berths, dates from the start of the register; the second doubled it in stone, and the third, the long breakwater, shelters both from the south-west swell.

3. Lists

- Water at every berth
  - cold, from the quay
  - hot, in the shower block
- Electricity
  - 16 A at berths 1 to 40
    - with a meter
    - without a meter
  - 32 A at the east pontoon
- Wi-Fi on the quay

Numbered, with other numbering styles at each level:

1. Call the office on channel 9
2. Give the length and the draught
   a) length over all, in metres
   b) draught, in metres
3. Take the berth you are given
   a) tie up bow first
   b) tie up stern first

4. Pay at the office

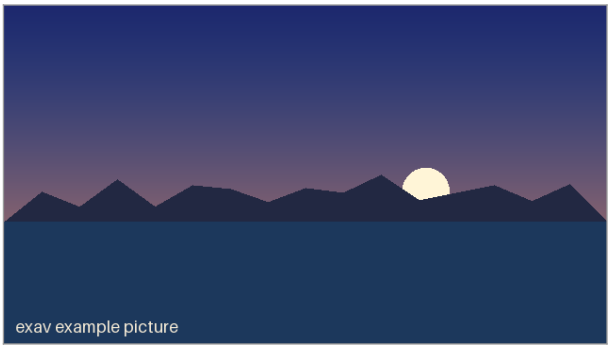

4. Tables

Table 1: berths by length, with merged cells and a repeated header row

Length	Berths	Let by	Fee (EUR)
up to 6 m	12	week	18.00
6 to 8 m	18	season	24.50
8 to 10 m	14	season	31.00
10 to 12 m	9	year	42.00
over 12 m	7	year	58.50
Total	60		

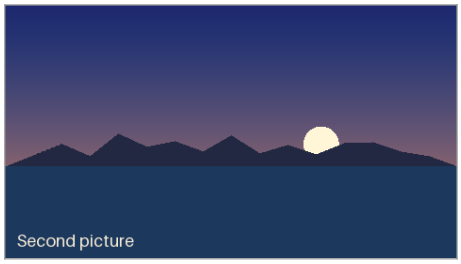

Merged across two columns		Merged down two rows
